Mohammed Zaid

mohammedzaid.26.10@gmail.com MohammedZaid +91 6364444851 Bangalore, INDIA

Profile

Computer Engineering graduate with an interdisciplinary foundation in business analytics and technology, with experience in data analysis, software development, and requirements engineering. Exposure to AI-driven and blockchain-based systems, combined with an interest in building scalable, startup-grade solutions and contributing to high-impact enterprise and government initiatives. Seeking advanced studies in Business Analytics and Management to strengthen strategic, data-driven decision-making at the intersection of business and technology.

Education

Presidency University, *Bachelor of Technology in Computer Engineering* 2020 Aug – 2024 Nov

Relevant Coursework: Machine Learning | Artificial Intelligence | Data Analytics | Deep Learning | Predictive Modeling | Statistical Analysis | Database Management Systems | Engineering Economics | Data Warehousing | Cloud Computing | Software Engineering | Web Technologies | Operating Systems | Business Intelligence Fundamentals

Narayana PU College – Science (PCMC), *Junior College* 2018 Jun – 2020 Mar

Relevant Coursework: Physics | Chemistry | Mathematics | Computer Science | Statistics | Logical Reasoning

Oasis International School, *IGCSE Curriculum* 2006 Jun – 2018 Mar

Relevant Coursework: Mathematics | Computer Science | Physics | Chemistry | Biology | Information & Communication Technology (ICT) | English | French | Arabic

Professional Experience

Advanced Millennium Technologies (AMT) , *Business Analyst* 2025 Aug – Present | Bengaluru, INDIA

- Working as a **core Business Analyst** across multiple enterprise and product-focused initiatives at **UIB**.
- Played a key role in **UIB** by managing end-to-end requirement gathering, workflow definition, and stakeholder alignment.
- Actively contributed to **UI/UX enhancements**, translating user feedback and business needs into clear and actionable product requirements.
- Supported **AI integration within the Unified Inbox product**, including use case definition, functional documentation, and coordination with AI and engineering teams.
- Acted as a bridge between clients, developers, and internal stakeholders, ensuring requirement clarity, scope control, and timely delivery.

Key Projects at AMT:

- **Unified Inbox (SaaS Product- UAI)**
  - Gathered and documented business and functional requirements for enterprise clients.
  - Created user stories, workflows, and feature specifications to support product enhancements.
  - Supported UI improvements and AI-driven features through structured documentation and stakeholder coordination.
- **ESCRA (Blockchain-based Platform)**
  - Served as the primary liaison between clients and development teams.
  - Gathered, analyzed, and framed functional and technical requirements for blockchain workflows.
  - Supported sprint planning, documentation, and scope alignment in an Agile environment.
- **SAGINT – Tokenized Compliance System for Rare Earth Mineral Verification (SaaS product- Sagint OS)**
  - Working on a **highly confidential blockchain compliance project** aligned with **US government DFARS requirements**.
  - Contributing to compliance-focused documentation and maintaining requirement traceability.
  - Supporting blockchain-based tokenization mechanisms within supply chain verification.

Startup & Product Experience

Qedence , *Co-Founder | Product & Business Strategy* 2025 Jan – Present | Bengaluru, INDIA

- Co-founded Qedence, a **high-potential product initiative positioned for startup scale-up**.
- Led early-stage product discovery, problem validation, and business requirement definition.
- Conducted business analytics discussions to convert abstract ideas into structured, executable solutions.
- Collaborated closely on feature planning, optimization of user flows, and overall product vision.
- Actively involved in shaping roadmap decisions with a focus on scalability and long-term viability.

Research & Internship Experience

Axpro , *Business Analyst Intern* 2024 Dec – 2025 Jun | Bengaluru, INDIA

- Contributed to product strategy discussions by identifying business opportunities, defining functional solutions, and supporting roadmap planning for enterprise SaaS platforms.
- Gathered and analyzed business requirements to support operational improvements and business decision-making.
- Participated in a **self driven project initiative** designed to apply business analytics methodologies with future scalability potential.

Taipei Medical University , *ICHIT Lab, Research Intern* 2024 May – 2024 Jul | Taipei, TAIWAN

- Secured fully funded international internship under the International Internship Pilot Program (IIPP).
- Conducted mortality risk prediction using hospice datasets from AMOR wellness watches.
- Contributed to research papers and academic presentations with visualized findings.
- Worked in a cross-functional team on AI innovation for aging and chronic care

Maskan Technologies , *Blockchain Development Trainee* 2023 Dec – 2024 Apr | Bengaluru, INDIA

- Led a team of interns in developing and modifying smart contracts.
- Improved blockchain architecture for scalability, performance, and security.
- Gained hands-on experience with decentralized systems and deployment workflows.

Projects

LifeSaver: Blood Donation Inventory Management System Web App using MERN Stack

Developed a blood inventory management system for the final year project using the **MERN (MongoDB, Express.js, React.js, Node.js)** stack, overcoming challenges in technology integration and user experience to streamline donor enrollment, appointment scheduling, and inventory tracking, resulting in improved efficiency and donor engagement.

Developed a dynamic e-learning platform for programming fundamentals naming CodeHub

Optimized platform performance by integrating **MySQL** for data management and **PHP** for dynamic back-end functionality, ensuring a seamless learning experience.

Publications

LIFESAVER: BLOOD DONATION MANAGEMENT SYSTEM WEB APP USING MERN STACK ,
International Research Journal of Modernization in Engineering Technology & Science (IRJMETS),Volume 06, Issue 01, 2023

Conducted research on the Blood Donation Management System and authored a paper titled"LifeSaver Blood Donation Management System Web App using MERN Stack," published in the International Research Journal of Modernization in Engineering Technology & Science (IRJMETS),Volume 06, Issue 01, 2023

Skills

Technical: HTML, CSS, JavaScript, React.js, Node.js, Next.js, Python, FastAPI, Plotly, RESTful APIs
Tools: Git, GitHub, VS Code, Docker, Postman
Databases: MySQL, MongoDB, PostgreSQL, Redis
Cloud & Infra: Cloudflare R2 (S3-compatible), Supabase, BullMQ (Queue/Async Processing)
Research: ML, Data Analytics, Healthcare IT, Literature Review
Methodologies: Agile & Scrum, DevOps, SDLC
Documentation & Deliverables: System Flow Diagrams and Process Maps, UAT Test Support Documentation
Business Analysis Core Skills: Requirements Gathering, Stakeholder Management, Business Process Mapping, Gap Analysis, Use Case Development, User , Requirement Documentation (BRD, FRD, RTM), KPI Definition
Analytics for Business: Business Analytics, Data Analysis, Data Visualization, Business Intelligence, Excel (Advanced)
Delivery & Ways of Working: Sprint Planning, Backlog Grooming, UAT Support, Cross-functional Collaboration
BA Tools: JIRA, Confluence, Visio, Power BI, Linear
Professional Skills: Communication, Analytical Thinking, Problem Solving, Presentation Skills

Certifications

Getting Started as a Business Analyst — LinkedIn Learning | **AI in Digital Marketing** — Great Learning | **Foundations of Project Management** — Google | **Work smarter with Microsoft Excel** — Microsoft | **Introduction to Web Development with HTML, CSS and JS** — IBM | **Foundations of User Experience (UX)** — Google | **Introduction to SQL** — Hackerrank | **Introduction to Cybersecurity** — CISCO | **Oracle Database Foundations** — Oracle | **Machine Learning** — SkillUp
